BBV SYSTEMS
WIR SORGEN FÜR SPANNUNG | WE STRESS FOR STRENGTH

Reference

ICE-Bahnhof Flughafen

SHORT DESCRIPTION

BBV Systems created the construction pit for the new ICE train station at Cologne / Bonn Airport.

THE PROJECT

For the construction pit of the new ICE train station at Cologne / Bonn Airport, approx. 2,000 m^2 of girder pile wall, 4,000 m^2 of sheet pile wall and 250 m^2 of overlapping bored pile wall were created.

7000 m BBV strand anchors and BBV single bar piles made it possible to construct up to 14 m free-standing sheeting walls.

FACTS

Location	Köln , Germany
Status	completed
Start of construction	January 2002
Completion	September 2002

SERVICES

Excavation pits
