

## ICE-Bahnhof Flughafen

### SHORT DESCRIPTION

BBV Systems created the construction pit for the new ICE train station at Cologne / Bonn Airport.

### THE PROJECT

For the construction pit of the new ICE train station at Cologne / Bonn Airport, approx. 2,000 m<sup>2</sup> of girder pile wall, 4,000 m<sup>2</sup> of sheet pile wall and 250 m<sup>2</sup> of overlapping bored pile wall were created.

7000 m BBV strand anchors and BBV single bar piles made it possible to construct up to 14 m free-standing sheeting walls.

### FACTS

<b>Location</b>	Köln, Germany
<b>Status</b>	completed
<b>Start of construction</b>	January 2002
<b>Completion</b>	September 2002

## SERVICES

---

Excavation pits
