

## ICE-Bahnhof Flughafen

## **SHORT DESCRIPTION**

BBV Systems created the construction pit for the new ICE train station at Cologne / Bonn Airport.

## **THE PROJECT**

For the construction pit of the new ICE train station at Cologne / Bonn Airport, approx.  $2,000 \text{ m}^2$  of girder pile wall,  $4,000 \text{ m}^2$  of sheet pile wall and  $250 \text{ m}^2$  of overlapping bored pile wall were created.

7000 m BBV strand anchors and BBV single bar piles made it possible to construct up to 14 m free-standing sheeting walls.

## **FACTS**

Location	Köln , Germany
Status	completed
Start of construction	January 2002
Completion	September 2002
