

## Hoje Bridge

### SHORT DESCRIPTION

As part of the Swedish Railways' Lund-Arlöv four-track expansion project, ARGE NCC/OHL was commissioned by Trafikverket to build the Höje Bridge.

### THE PROJECT

As part of the Swedish Railways' Lund-Arlöv four-track expansion project, ARGE NCC/OHL was commissioned by Trafikverket to build the Höje Bridge.

The Höje Bridge is a 115 m long, 4-span post-tensioned concrete bridge.

In the summer of 2021, BBV Systems provided the required post-tensioning of the superstructure by means of BBV L19 tendons. Installation, stressing and grouting works were performed by qualified BBV personnel.

### FACTS

<b>Location</b>	Arlöv , Sweden
<b>Status</b>	completed
<b>Start of construction</b>	March 2021
<b>Completion</b>	October 2021
<b>Building owner</b>	Trafikverket
